

Headcount do not need
to go down it need to be
steady, that is a
sustainable company.

When more employees are not working on the floor
with service and customer (hands) Arends due to
robot installation, companies still have to hire work
force so people have something to do.

What is the focus:

- Social Media
- Next type of service work together with robots
- Economy
- Sales
- ...

Its better to work as a sales team and social media
team than let one person do all the work for the
company. Think about it.
